The End of Liberal Democracy? Symposium

March 19, 2020

Room A 300

The End of Liberal Democracy?

Liberal democracy seems to be under more pressure than ever. Social polarisation, loss of trust between citizens and elites, widening gaps in representation – and right-wing populist movements that seem to be filling these gaps – are giving liberal democracy a hard time. Sometimes there is even talk of the end of liberal democracy. Whether such an end is really threatening is an open question. In fact, however, with the retirement of the director, Wolfgang Merkel, the research program of the WZB's Democracy and Democratization department is coming to an end after 16 years. On this occasion, an international symposium with distinguished experts will discuss central theses of the department's and its director's research.
